

May 19, 2022

Dear Health Care Center Residents and Families:

As of today, we have no active COVID-19 resident cases, however, this afternoon we learned one of our caregiver team members tested positive for COVID-19 during routine testing. The team member is not having symptoms and only worked for a few hours this week.

All residents and team members who had close contact with the team member were tested today.

We continue to monitor everyone for symptoms, wear the proper personal protective equipment and practice social distancing. We will continue testing twice a week through next week. If no positive test results are found, our outbreak status will end.

I will notify you as changes occur.

Sincerely,

Jennifer Miller
Director of Health Services
