

March 16, 2023

Dear Diven House Residents and Families:

Yesterday, one team member tested positive for COVID-19. Our outbreak continues. In accordance with protocols, further testing did not reveal any other positive results.

For everyone's safety, anyone who is **experiencing cold-like symptoms** should refrain from coming to CLV.

- Visitors should plan to visit when they are feeling better.
- Team members should refrain from working until they feel better.

Visitors are encouraged to be masked the entire time in the facility, regardless of vaccination status. All team members are required to wear masks.

All residents and team members continue to be monitored for symptoms. Proper personal protective equipment continues to be worn and social distancing is being maintained.

I will continue to provide updates on all changes in our outbreak status.

Sincerely,

Jennifer Miller, NHA  
Director of Health Services
